amino resin in column 5, lines 35-50. Homma also has disclosure of curing agents and polymers from unsaturated monomers. Hendrix discloses polymers from unsaturated monomer and carboxy acrylic polymers in column 11, lines 45-60. Du Pont discloses etherified amino resin in column 8, line 65 and polyvinyl alcohol in column 8, lines 15-18. Du Pont also has disclosure of polymers from unsaturated monomer and curing agents. Demarey discloses etherified amino resin in column 3, line 20 and polyvinyl alcohol in column 8, line 62. Demarey also discloses curing agents and polymers from unsaturated monomer. Mudge discloses polymers from unsaturated monomers having cross-linking groups in claim 1 and ethylenically unsaturated carboxylic acid in claim 6. Burgert discloses polymers from unsaturated monomer having cross-linking groups and polyvinyl alcohol in claims 1 and 2. Schulz discloses etherified amino resin in column 7, lines 30-35 and polyvinyl alcohol in column 24, line 63. Schulz also discloses polymers from unsaturated monomer and curing agents. It would be obvious to one of ordinary skill in the art to formulate compositions according to these references comprising etherified amino resin, polymer from unsaturated monomer, curing agent and polyvinyl alcohol and it would be obvious to formulate compositions according to these references comprising polymer from unsaturated monomer having cross-linking groups, carboxylic acid, and polyvinyl alcohol. The motivation is that all of the references
